

Our energy-efficient RKT series LED recessed retrofit downlight offers uniform light distribution as well as single bin color consistency. Ideal for 65W BR40 incandescent lamp replacement and consuming less than 16W, LED recessed retrofit enables 50-75% energy savings and more than 50,000 hour maintenance free operation. A couple advantages to using these fixtures are their enhanced illumination and reduced glare, as well as the single bin, uniform color. They are mercury and lead free and offer instant on/ full brightness. This LED retrofit downlight also fits into most recessed cans and are compatible with most dimmers.
